

8MW Mega Farm

Purchase and Lease Opportunity

Hosting Solution

Deploy one or more 40' Data Center Units at GoGo Tech's 9mw Site. One time CapEx covers deployment of your containers and all infrastructure build out.

4c kWh electricity rate

GoGo Tech will offer a pass-through rate as negotiated with the local Utility Power company.

1MW Container

Your one-time purchase covers 40' Fully built mining Container, power connection and installation. Each container will have dedicated 1,000 kva of power and high-speed internet.

Deploy your own miners, host for 3rd party or let GoGo Tech provide hosting clients.

The connection and infrastructure work will be done by GoGo Tech, including installation of the transformers, cables, data, security, and all other construction.

- 40+ foot container
- **345+ Slots** for S19 or equivalent miners
- **1MW** Capacity
- Exhaust fans are included
- Pass through rate of **\$0.035 kWh**
- GoGo Tech mining management fee of **\$0.005 kWh**
- **\$0.04 kW all-in rate**
- **95%** up-time with DRR

Cost: \$400,000

- 1MW Dedicated Power
- 40+ Foot Fully Built Mining Container
- Installation
- Infrastructure and Connection
- \$0.035 kWh rate
- 10 year Lease Agreement, renewed annually
- No cost to renew
- High Speed Internet
- Option to sell container to GoGo Tech

Container

40+ Foot, 1MW Capacity

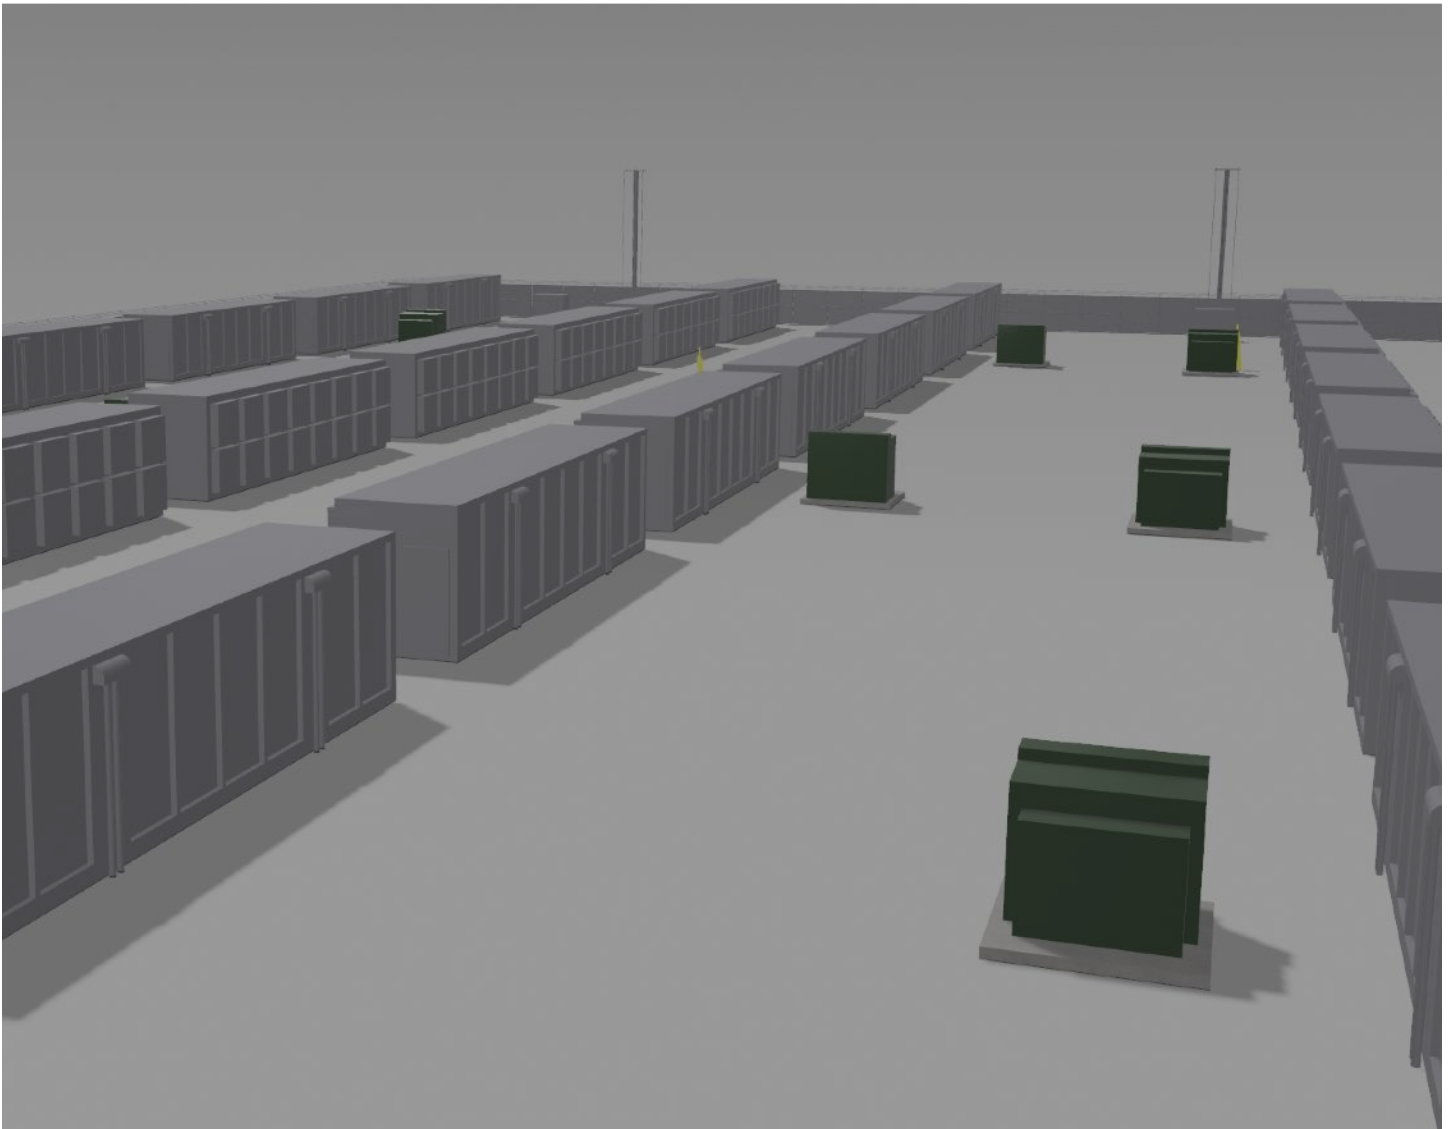

- CSC Approved and Certified
- 415Y/240V 3P+N+G connection
- 2x960 A Distribution panels
- 18xPDUs 240/415V
- Exhaust Fans

The container has 345 slots for S19 type miner, significantly more than needed to use up all 1MW. This is done intentionally to allow clients to mine using Low-Power mode. This will free up power and allow deployment of additional machines.

All containers are custom built for GoGo Tech

Disclaimer. The type of the container, it's length, size, slots, options, and other features can vary. Electric pass-through rate is based on Power Purchasing Agreement signed with local Utility Company. GoGo Tech will not guarantee the power rate, but will guarantee the pass-through rate. The construction start and finish dates may vary. The 98% electricity uptime might vary based on unpredictable DRR event.
